Connect to databse

connect

Enter user-name: system

Enter password:

Connected.

Once connected as SYSTEM, simply issue the CREATE USER command to generate a new account.
CREATE USER phcet IDENTIFIED BY mes;

With our new phcet account created, we can now begin adding privileges to the account using the GRANT statement. GRANT is a very powerful statement with many possible options, but the core functionality is to manage the privileges of both users and roles throughout the database.

Providing roles

Typically, you'll first want to assign privileges to the user through attaching the account to various roles, starting with the CONNECT role:

SQL>GRANT CONNECT TO phcet;

Grant succeeded.

In some cases to create a more powerful user, you may also consider adding the RESOURCE role (allowing the user to create named types for custom schemas) or even the DBA role, which allows the user to not only create custom named types but alter and destroy them as well.

SQL> GRANT CONNECT, RESOURCE, DBA TO phcet;

Grant succeeded.

Assigning privileges

Next you'll want to ensure the user has privileges to actually connect to the database and create a session using GRANT CREATE SESSION. We'll also combine that with all privileges using GRANT ANY PRIVILEGE.

SQL>GRANT CREATE SESSION TO phcet;

Grant succeeded.

We also need to ensure our new user has disk space allocated in the system to actually create or modify tables and data, so we'll GRANT TABLESPACE like so:

SQL>GRANT UNLIMITED TABLESPACE TO phcet;

Grant succeeded.

Table privileges

While not typically necessary in newer versions of Oracle, some older installations may require that you manually specify the access rights the new user has to a specific schema and database tables.

For example, if we want ourphcet user to have the ability to perform SELECT, UPDATE, INSERT, and DELETE capabilities on the books table, we might execute the following GRANT statement:

SQL>CREATE TABLE STUD(ID NUMBER(5),NAME VARCHAR2(20));

Table created.

SQL>GRANT SELECT,INSERT,UPDATE,DELETE ON STUD TO phcet;

Grant succeeded.
